

Research Associate

Project Profile:

I have a research project aimed at assessing the cost of non-communicable diseases. I will need a (or two) research associate(s) to work with me on the said project. These research position/s involve review of literature, quantitative analyses, economic modelling and report writing. The findings of this study will have significant policy implications and the work is expected to pave the way for health policy development in India.

Job Description / Responsibilities:

- Conduct literature review
- Contribute to adoption of appropriate research design
- Perform advanced quantitative research analysis
- Contribute to interpretation of data analysis
- Contribute to policy brief preparation and report writing

The candidate is expected to have:

Essential:

Research Associate position: PhD (in economics/social sciences/population studies/public health) or postgraduate qualification in social sciences with 2 years experience in research with evidence of leadership in research and emphasis on advanced quantitative analysis.

Good working knowledge of statistical packages such as SPSS/Stata/R for Advanced quantitative analysis skills.

Knowledge and skills:

- Strong attention to detail and rigorous methodological approach
- Problem-solving ability
- Results oriented and able to deliver on time

Ability to work flexibly and good time management

Remuneration: it will be commensurate with qualification and experience.

Duration of project: 8 months (immediate requirement) but there could be opportunities for work even after the completion of this project.

The last date for receipt of applications is 15th February.

Please apply with detailed CV and a supporting statement highlighting how your qualifications and experience meet the selection criteria for this post. Send application to: Dr. Soumitra Ghosh. Email: soumitra.who@gmail.com
